

Ever since the company was founded in 1948, SPT maritime et industriel has been active in three areas :

- **CONSTRUCTION**, when it comes to building and fitting out newly built or renovated buildings, in locksmith, metalwork and framework specialties.
- **ENGINEERING** for maintaining, designing and manufacturing mechanical assemblies, boiler making specialties and metal structures in numerous industrial fields.
- **MARINE AND OFFSHORE** for designing, building or renovating accommodation areas and technical facilities onboard offshore pumping or drilling rigs as well as for all kinds of civilian and military vessels.

Our expertise, born of our 60 years of experience means that we can bring our clients turnkey solutions to even the most specific issues.

We have the design, production, logistics, storage and construction resources at all of our facilities, so that we can offer a complete and reactive response to all of your projects needs.

Since 1986, SPTmi is compliant with the various quality requirements and standards and is able to implement Quality Assurance Plans that are specific to every contract. We also apply the principles set out in the ISO 9001:2008 standard.

Our company is present at Marseille, La Seyne sur Mer and Brest in France, and Cape Town, South Africa.

Our Resources

spt

maritime et industriel

Head office - Marseille, France

A metalworking shop covering 2,000 m² comprising :

- . Shears for steel panels 1 to 10 mm thick and up to 3 metres wide
- . A numerically controlled metal shaper for sheets of up to 4 mm thick and 3 metres wide
- . A steel section bender
- . A steel section shaper
- . A punch
- . A 40 tons rectifier press
- . A band saw
- . TIG, MIG welding stations

A woodworking shop covering 2,000 m² comprising :

- . A beam edger
- . A four-sided surface planing machine
- . A panel saw
- . A gluing unit and press
- . An edge gluing unit
- . A shaper
- . A jointer

A paint and varnish spray booth.

A truck : 4.5 x 2.1 metres; load capacity: 2.5 tons; 1.1 ton lifting capacity on board the truck.

A 1,000 m² equipment storage warehouse (for up to 500 palettes on racks).

A 4,000 m² open air storage area for receiving, storing and sending out containers.

Local agency - La Seyne, France

A metalworking shop covering 1,000 m² comprising:

- . Shears for steel panels 1 to 5 mm thick and up to 3 metres wide
- . A numerically controlled metal shaper for sheets of up to 4 mm thick and 3 metres wide
- . A steel section bender and shaper
- . A band saw
- . TIG, MIG welding stations

A woodworking shop covering 1,000 m² comprising:

- . A panel saw
- . An edge gluing unit

A truck : 4.5 x 2.1 metres ; load capacity : 2.5 tons.

A 500 m² storage warehouse.

Local agency - Brest, France

A metalworking shop covering 800 m² comprising :

- . Shears for steel panels 1 to 5 mm thick and up to 3 metres wide
- . A numerically controlled metal shaper for sheets of up to 4 mm thick and 3 metres wide
- . A steel section bender and shaper
- . A band saw
- . TIG, MIG welding stations

A woodworking shop covering 500 m² comprising :

- . A panel saw
- . An edge gluing unit

A 500m² storage warehouse.

Subsidiary Company Cape Town, South Africa

A 1,500 m² sorted equipment storage warehouse for marine and offshore applications

www.sptmi.com

SPTmi offers its expertise and its services in maintenance, designing and manufacturing mechanical assemblies, boiler making and in metal structures for various industrial sectors (agro-food, aeronautics, cement, cosmetics, defence, packaging, logistics, pharmaceuticals, phytosanitary products, transportation, etc.).

Areas of Expertise

- . Making available specialised technicians for maintaining production lines.
- . Improving production line performance
- . Undertaking work to bring production installations into compliance (production or packaging lines).
- . Designing, building and integrating conveyor equipment (for products in bulk and individual loads).
- . Designing and building special equipment.

Strong Points

- . More than 25 years of practical experience with recognised industrial clients means that we have a good knowledge of needs and the constraints of every business sector.
- . A design office with state of the art equipment (CAD).
- . Qualified staff for doing the work and meeting commitments both in terms of technical design and lead-time challenges.
